- Python
- WebDevelopment

Projects

HydroHub

[Project Link](#)

Currently working on it.

HydroHub is an expansive, modern web platform dedicated to accelerating the clean energy transition. It makes hydrogen fuel knowledge accessible to everyone — from industry professionals and researchers to students and clean energy enthusiasts.

Finpilot

[Project Link](#)

Made wireframes and design documentation for a Financial Management Application. The designs were created using FigmaA modern financial management application UI/UX design crafted in Figma, featuring intuitive dashboards, transaction tracking, and data visualization for seamless user experiences.

Achievements

GDG Hackathon

Lead a team in a 24Hrs Hackathon and Cleared 2 rounds with our project Eventra.

ECSOC Onboarded

Officially onboarded as a Contributor for the Elite Coders Summer of Code (ECSoc) 2026 cohort. Looking forward to contributing to open-source projects, collaborating with talented developers, and strengthening my software development skills through this exciting journey.
